

Disclaimer for Open-Source Hardware Project

This is an open-source hardware project designed for educational and testing purposes only. The creators, contributors, and maintainers of this project make no warranties, express or implied, regarding the design, functionality, or safety of this hardware.

By using this project, you acknowledge that:

The hardware is provided "AS IS" without any guarantees of performance, reliability, or fitness for any particular purpose.

You assume all risks associated with its use, including but not limited to electrical hazards, damage to equipment, or personal injury.

The project developers shall not be held liable for any direct, indirect, incidental, or consequential damages resulting from the use or misuse of this hardware.

Always exercise caution when working with electrical components and consult qualified professionals for safety compliance. Your use of this project constitutes acceptance of these terms.

Note: This hardware has not been certified by any regulatory body (e.g., FCC, CE, UL) unless explicitly stated. Commercial use may require additional compliance testing.
